Soft QCD measurements at LHCb

Saturday, 5 July 2014 13:15 (15)

Its forward acceptance puts the LHCb in a unique position at the LHC to measure soft QCD phenomena at large rapidities and low transverse momenta. Recent results on charged particle multiplicity production, energy flow, and inclusive cross-sections are presented.

Summary

Primary author(s) : LEROY, Olivier (CPPM, Aix-Marseille Université CNRS/IN2P3, Marseille, France)

Presenter(s) : Dr. VOLYANSKY, Dmytro (Max-Planck-Institut für Kernphysik)

Session Classification : Strong Interactions and Hadron Physics

Track Classification : Strong Interactions and Hadron Physics
