Searches for direct pair production of third generation squarks with the ATLAS detector

Thursday, 3 July 2014 11:45 (15)

Naturalness arguments for weak-scale supersymmetry favour supersymmetric partners of the third generation quarks with masses not too far from those of their Standard Model counterparts. Top or bottom squarks with masses less than a few hundred GeV can also give rise to direct pair production rates at the LHC that can be observed in the data sample recorded by the ATLAS detector. The talk presents recent ATLAS results from searches for direct stop and sbottom pair production.

Summary

Primary author(s) : ATLAS, Collaboration (CERN)

Presenter(s) : Dr. FIRMINO DA COSTA, Joao (CEA Saclay)

Session Classification : Beyond the Standard Model

Track Classification : Beyond the Standard Model
