## **Inclusive searches for squarks and gluinos with the ATLAS detector**

*Thursday, 3 July 2014 11:15 (15)*

Despite the absence of experimental evidence, weak scale supersymmetry remains one of the best motivated and studied Standard Model extensions. This talk summarises recent ATLAS results on inclusive searches for supersymmetric squarks and gluinos. Results are presented for searches in final state events containing jets, missing transverse momentum, light leptons, taus or photons.

### **Summary**

**Primary author(s) :** ATLAS, Collaboration (CERN)

**Presenter(s) :** Dr. MITREVSKI, Jovan (Ludwig-Maximilians-Universität München)

**Session Classification :** Beyond the Standard Model

**Track Classification :** Beyond the Standard Model
