Searches for new Physics in events with multiple leptons with the ATLAS detector

Thursday, 3 July 2014 16:20 (15)

Events containing several leptons are useful probes of new phenomena due to the low background from Standard Model processes. We look for anomalous production of prompt like-sign leptons or events with three or more leptons, as well as search for excited leptons, heavy leptons and heavy neutrinos. Searches for lepton-flavor violation are also presented. The searches use data recorded in 2012 at $\sqrt{s}=8$ TeV centre-of-mass energy by the ATLAS experiment at the LHC.

Summary

Primary author(s) : ATLAS, Collaboration (CERN)

Presenter(s) : Dr. FIORINI, Luca (IFIC / U. Valencia)

Session Classification : Beyond the Standard Model

Track Classification : Beyond the Standard Model
