## Search for Long-lived particles at CMS

*Thursday, 3 July 2014 16:35 (15)*

The most recent searches for long-lived particles at CMS is presented. Searches for displaced jets, displaced leptons, displaced tops, heavy stable charged particles, and stopped particles are among those discussed. A variety of models are constrained by these searches, ranging from hidden valleys to split supersymmetry.

### Summary

**Primary author(s)** : MEYER, Arnd (RWTH Aachen University)

**Presenter(s)** : Mr. LUJAN, Paul (Princeton University)

**Session Classification** : Beyond the Standard Model

**Track Classification** : Beyond the Standard Model
