SUSY fits with full LHC Run I data

Thursday, 3 July 2014 15:15 (15)

We present the latest results from the MasterCode collaboration on supersymmetric models, in particular on the CMSSM, the NUHM1, the NUHM2 and the pMSSM. We combine the data from LHC Run I with astrophysical observables, flavor and electroweak precision observables. We determine the best fit regions of these models and analyze the discovery potential at LHC Run II.

Summary

Primary author(s) : Prof. ELLIS, John (King's College London); Mr. DE VRIES, Kees Jan (Imperial College London); Prof. OLIVE, Keith (University of Minnesota); Dr. BUCHMUELLER, Oliver (Imperial College London); Dr. HEINEMEYER, Sven (Instituto de Fisica de Cantabria IFCA-CSIC)

Co-author(s) : Prof. DE ROECK, Albert (Antwerp University); Dr. MARTÍNEZ SANTOS, Diego (NIKHEF); Dr. RONGA, Frédéric (ETH Zürich); Dr. WEIGLEIN, Georg (DESY); Dr. ISIDORI, Gino (Laboratori Nazionali di Frascati); Dr. FLAECHER, Henning (University of Bristol); Dr. MARROUCHE, Jad (CERN); Mr. CITRON, Matthew (Imperial College London); Dr. DOLAN, Matthew (SLAC National Accelerator Laboratory); Dr. CAVANAUGH, Richard (Fermi National Accelerator Laboratory); Dr. MALIK, Sarah (Imperial College London)

Presenter(s) : Mr. DE VRIES, Kees Jan (Imperial College London)

Session Classification : Beyond the Standard Model

Track Classification : Beyond the Standard Model
