## Measurement of the phase of Bs mixing with $B_s \rightarrow J/\psi h h$ decays

*Friday, 4 July 2014 09:55 (15)*

The Bs meson provides an ideal laboratory for measurements of CP violation and searches for CPV beyond the Standard Model. We present recent LHCb results on measurements of the Bs mixing phase using  $B_s \rightarrow J/\psi K K$  and  $J/\psi \pi \pi$  decays.
