Electroweak strongly coupled models with a light Higgs

Friday, 4 July 2014 09:45 (15)

We study strongly coupled models of electroweak symmetry breaking with a light Higgs boson. We use a resonance effective Lagrangian with bosonic massive resonances together with the Standard Model degrees of freedom, including a light Higgs. We consider constraints from the phenomenology and from the assumed high-energy behavior of the underlying theory. This resonance effective theory can be used to estimate the low-energy constants (LECs) of the Electroweak Effective Theory in terms of resonance parameters and to make predictions of low-energy observables like, for instance, the oblique parameters.

Summary

Primary author(s) : Dr. ROSELL, Ignasi (Universidad CEU Cardenal Herrera & IFIC)

Co-author(s) : Prof. PICH, Antonio (Universitat de València - IFIC); Dr. SANZ-CILLERO, Juan Jose (Universidad Autónoma de Madrid - IFT)

Presenter(s) : Dr. ROSELL, Ignasi (Universidad CEU Cardenal Herrera & IFIC)

Session Classification : Beyond the Standard Model

Track Classification : Beyond the Standard Model
