

Planck 2016

Tuesday 24 May 2016

Cosmo 2 (15:00-16:40)

time	[id] title	presenter
15:00	[188] Knotty inflation and the dimensionality of spacetime	PÄS, Heinrich
15:20	[97] Cosmological domain walls from Higgs effective potential	KRAJEWSKI, Tomasz
15:40	[112] Frame-Covariant Formulation of Inflation in Scalar-Curvature Theories	KARAMITSOS, Sotirios
16:00	[159] Electroweak vacuum stability and inflation via nonminimal derivative couplings to gravity	DI VITA, Stefano
16:20	[20] Aspects of perturbativity, vacuum stability and inflation in the light of recent diphoton excess	DHURIA, Mansi
