

Nuevas demandas en computacion y servicios IT para investigación orientada a la innovación

martes, 13 de marzo de 2018 12:30 (10)

Research working together with the industry requires an upgrade of good-practices in terms of protect intellectual property, reproducible research and work in regulated environments. This is a presentation of several approaches carried together with the IFIC computing department, and a view of future requirements that will be needed when this research is getting mature
