## Modelling lepton mixing parameters and neutrino masses

*Tuesday, 11 June 2019 09:30 (30)*

In this talk I will give a concise overview over different ideas to explain lepton mixing parameters and neutrino masses. I will also briefly mention possible connections to the quark sector as well as potential imprints of these ideas beyond lepton mixing parameters and neutrino masses in concrete models.

**Presenter(s)** : HAGEDORN, Claudia

**Session Classification** : Neutrinos (I)
