

Neutron deficient exotic nuclei and the Physics of the "proton rich side" of the nuclear chart

Contribution ID : 28

Type : **not specified**

Alpha clusters

Wednesday, 23 February 2011 13:00 (40)

The talk will examine the possible influence of clustering correlations on the structure of light proton-rich (neutron-deficient) nuclei and how the properties of such systems will be different to those on the neutron-rich side of stability. This discussion will be motivated by the presentation of previous measurements.
