

Postdoc at IFIC | VEGA group | ANTARES and KM3NeT Collaborations | CIDEAGENT 2022

- 2008 PhD in Particle Physics: prompt neutrinos with AMANDA-IceCube
- Cosmic ray anisotropy with the Pierre Auger Observatory
- Gamma-ray astronomy with the MAGIC Telescopes
- Indirect dark matter searches with ANTARES and KM3NeT

- ① Convener of Dark Matter and Exotics working group in ANTARES and KM3NeT
- ② Projects: data analysis looking for dark matter signatures and fundamental neutrino properties
- ③ Supervision of Masters' and PhD students
