2025 Breakthrough Prize in Fundamental Physics

The collaborations of the four large LHC experiments — ATLAS, CMS, ALICE, and LHCb — have been awarded the 2025 Breakthrough Prize in Fundamental Physics for their results obtained from the Run-2 datasets. The short version of the prize citation is:

For detailed measurements of Higgs boson properties confirming the symmetry-breaking mechanism of mass generation, the discovery of new strongly interacting particles, the study of rare processes and matter-antimatter asymmetry, and the exploration of nature at the shortest distances and most extreme conditions at CERN's Large Hadron Collider.

News in our group

Victoria Castillo

- Full Professor of the University of Valencia, very well-deserved retirement

Luca Fiorini

- Promotion to Full Professor of the University of Valencia

Alberto Valero

- Promotion to Científico Titular CSIC

New doctors:

- Antonio Gómez, Antonio Cervelló, Varsha Senthilkumar

In memoriam

Antonio Ferrer Soria (1945-2025)

Full Professor of the University of Valencia

Senior member of the TileCal Valencia group

Pioneer of High Energy Physics in Spain
