Osciloscopio devuelve los puntos que pone en la pantalla. Por defecto son 1000 puntos, si lo pones en el modo NORMAL, pero al ponerlo en modo RAW te da explícitamente lo que indica en la pantalla.

```
scope.write('WAVEform:MODE RAW')  
#scope.write('WAVEform:MODE NORMAL')
```

En este caso son 200 puntos. Para una IF de 297 MHz continuo.

1. Readout BPM avances

En este caso son 80 puntos. También para una IF de 297 MHz.
(También hice pruebas para 2000, 4000, 800 puntos)

3. Lista de componentes

Tres diferentes listas según prioridad

- Essential (1 BPM): **650** euros aprox.
- Doble BPM: **1500** euros aprox.
- Korean BPM (3 BPMs): **3000-4000** euros aprox. dependiendo de lo que podamos usar de los coreanos (híbridos, splitter...) y de lo que tenemos aquí en inventario.

Propuesta: comprar ya lo esencial, y decidir comprar para trabajar con doble BPM más adelante.
